July 19, 2021

### **CYBERSECURITY ALERT - CLOUDSTAR:**

#### **BANKING AND TITLE INSURANCE SERVICES/SECURITY PROVIDER REPORTS IT HAS BEEN THE VICTIM OF RANSOMWARE ATTACK**

As most of you already know, Cloudstar reported on Friday, July 16, 2021, that it was the victim of a ransomware attack, and all of its systems and services remain unavailable. If your company has been affected by this incident, one short-term solution may be to implement software from another provider temporarily to allow your escrow closings to take place on time, or as soon as possible. The ALTA has posted a news article, click on the link below to view.
